

³SixtySage®

³SixtySage® is a powerful web-based platform for multi-rater feedback surveys. Scalable and secure, its flexible design includes a series of custom controls, called preferences, to tailor the survey process to your organization's needs. Each preference can be applied systemwide or modified at the administrative level — allowing for a high level of distributed control not available in other products.

Once your preferences are set, the process is automatic and requires no consultant intervention. Mid-stream changes that are impossible for other products to accommodate are easy with ³SixtySage®. Its powerful reporting capabilities let you view response rates in real time — and even create your own benchmark groups.

³SixtySage® is available as a hosted application directly to Valtera clients or through authorized distributors.

Ask for a demo to learn how this advanced tool can give you back control of your organization's multi-rater process.

Benefits

- Translated, tested, and ready to go in 18 languages*
- Save time and money with reduced project costs
- Benchmark individual scores against group norms
- Choose from a variety of report types
